IV. THE WATERBLOCKS BUSINESS PLAN

OVERVIEW

The Company's sole intent and primary objective is to raise sufficient capital necessary to begin operations at the earliest possible date. Our Business Plan is dependent upon and will be scaled based on a direct correlation to the amount of capital raised.

In summary we will be undertaking the following actions:

- acquire sufficient office space to accommodate staffing
- higher staffing as needed
- install and initialize IT operations to automate the company
- begin marketing operations
- attend industry related shows for product demonstrations
- create a software development and action plan for the Barrier Sharing Network
- begin the development of a global licensing program

these activities will result in the initial Revenue Generation anticipated.

Our secondary objective is to pursue a number of other sources of barrier sharing network inventory for further development through the creation of revenue sharing agreement(s) as investment opportunities, for Corporate Social Responsibility departments and the thousands of nonprofit (501C(3)) charitable organizations to participate in. We intend to use this tool to provide an ongoing expansion of inventory of truckloads of WaterBlocks on the Barrier Sharing Network.

The Problem to Resolve:

How Do You Stop a Flood?

You Don't! All you can do is divert the flood waters elsewhere.

So what can stand between a **community** and a **flood**?

Flooding is a **growing concern for millions of people and municipalities nationwide**. Despite that, there haven't been any major enhancements to flood protection over past years, leaving us relegated to **these basic tools**:

concrete walls

jersey barriers

sandbags

anything handy

Fact is - once it starts raining, it's already too late. Communities need a **faster, more reliable solution** to this looming threat. Most all **flood control tools currently** available in the US **are heavy, not easily moveable or deployable** and typically **permanent** once constructed.

Over the past three years we have had extensive discussions with **municipalities** and various **governmental agencies** reflecting a common theme professed by all; “**an additional source of flood barrier supply and support is needed**. Our *communities'* needs can't just rely on FEMA, NGO's and the occasional local vendor.” See our 'Market Feasibility Study in the Exhibits.

There are, of course, a number of existing plastic barriers on the market. However, being designed for traffic safety and control, their uses are **limited**, and the design rendering them **useless** for flood control or liquid overflow management.

**** **SO WHAT ARE THE SOLUTIONS?** ****

A. The Solution - Part 1

In response to the unresolved need for new and improved flood, crowd, and environmental protection systems, **Locking Line Barriers proudly introduces WaterBlocks™ to the world.**

WaterBlocks™ are our proprietary line of **steel-reinforced plastic polyethylene blocks which link and lock together** using vinyl seals to create a **rapidly-deployable plastic wall of watertight protection** that prevents liquid penetration at the joints, provides a dry side of protection and diverts the flow of flood water and other fluids.

Since disaster response calls for fast action, we've also ingeniously designed our lightweight blocks to **fit together both when deployed and during shipping** - so that an entire fleet of **WaterBlocks™** may be **rapidly-deployed via semi-trailer trucks.**

The Product(s) – WaterBlocks:

The initial products are flood, fluids, crowd and traffic control barrier systems comprised of five components; Main units, End Caps, Left, and Right turning units and Quick Release Q/R units. The main units become one and stand alone or, by incorporating the other units, can be assembled into a temporary barrier wall configured to almost any topography.

Each unit is hollow and constructed of steel reinforced polyethylene via a roto-molding process. Product assembly includes the installation of the vinyl seals to create a watertight joint between units, and installation of the ballast doors that permit water to enter and exit the unit. Final assembly includes the application of warning messages and any advertising messages, some of which may be molded into the product. Each unit has a minimum life expectancy of twenty (20) years, based upon the raw material supplier's warranty of 18 years.

The initial “Flood Control Design” has been modified numerous times during the past three years to accommodate improvements and new innovations to expand the versatility and usage applications of the products and thereby expand the potential market for the product. The most notable design changes include:

Specialized 2 and 3-way doors: To permit barrier filling water to be added both by mechanical means and by the rising flood waters automatically. This design permits the barrier to be emptied quickly and provide access to utilize mechanical lifting of the barriers.

The inclusion: Of an opening in the center of the male joint to accept the insertion of a standard steel fence pole in the joint. The water filled barriers provide a suitable foundation to permit the addition of multiple types of fencing (walls) of suitable height and materials to be added as needed.

Double Stacking Capability: Design changes permit (1) cube of (2) barriers to lock a third barrier on top of the cube and thereby increase the height of the stack to 8 Feet, final dimensions for such a stack would be 4' L x 4' W x 8' H. When water filled: the 4' wide stack would increase the stack weight from approximately 150 lbs. empty to 5,250 lbs.

Permanent Markings: Permanently molded into the plastic for the life of the product with custom colors on the barriers on the Billboard Style front area which allows for custom artwork, logos and notifications to be emblazoned permanently into the product.

New Polyethylene Resins: Guaranteed to extend product life for 18 to 20 years.

Block Wall Unitization: We have designed, developed and filed for patent protection as to the means and methodology to unitize and lock together a double stacked wall of Locking Line Barriers in such a fashion as to be able to stop a rubber tired vehicle, such as a semi-trailer truck with a 40,000 lb. load of cargo, traveling at 50mph dead in its tracks. We estimate no more than about 20' of wall movement resulting from such an impact as the wall collapses around the vehicle, minimizing any exploding shrapnel as it is absorbed by the water in the barriers. The Company intends to seek Grant(s) of \$1M+ from either or both Department of Homeland Security and the Department of Defense to fund an actual physical test of this feature to become a DHS Certified Terrorist Threat Deterrent.

WaterBlocks™ Multiple Use – Multiple Markets Design and Applications

Containment Walls
For keeping flood water out

Diversionary Walls
For re-directing flood water as needed

The team at LLB is always striving to create the very best product and marketable solutions. We've already incorporated numerous design enhancements and improvements to expand the versatility, function and range of applications for WaterBlocks™. And while our main focus is and will continue to be to provide superior flood protection, our ingenious line of products may also be utilized for a wide range of other uses.

Locking Line Barriers Corporation offers a multi-use product line with the versatility and features capable of providing unique solutions in multiple markets.

Construction & Drilling Site Safety
 INCLUDING fence post holes for
 additional height & security

Pools & Ponds
 For protection / conservation of water
 and/or other natural resources

Islands of Safety
 Strong, mobile protection from flood water &
 other threats

In addition to fine-tuning a range of extended applications, WaterBlocks™ the has a new design, developed and filed for patent-protection, as Truck Blockade Walls, we call it the TruckCrusher!

The standard width of a street in the USA is 29' curb to curb.

Double-stacked 4' wide x 8' tall x 28' long (21 barriers) is approximately 34,700 lbs. of protective stopping power!

When double-stacked together, WaterBlocks can stop a rubber-tired vehicle in its tracks, i.e., a direct hit from a semi-trailer truck with 20-tons worth of cargo will result in the wall of water-filled blocks crushing the vehicle and mitigating the force of any exploding shrapnel from a weaponized vehicle terrorist attack.

Such applications make WaterBlocks™ particularly marketable to municipalities, public organizations and private companies executing large-scale events with large crowd attendance.

B. The Solution - Part 2

Each WaterBlock™ is equipped with an RFID Chip for easy inventory tracking.

And every Trailer is GPS-enabled, on the Barrier Sharing Network presenting a nationwide network of readily-available WaterBlocks™ inventory which can be rapidly-deployed to communities in need before flooding strikes.

Flooding strikes randomly and with little notice for preparation. There is no solution to permit everyone to be prepared with adequate barrier protection. Therefore, a need exists to create a pool of Barriers that can be rapidly moved on short notice quickly and cost effectively in response to pending flood threats regardless of location, which we named the Barrier Sharing Network (BSN).

The solution is to create a network of barrier inventories located around the country that can be rapidly deployed to those in need when the time comes. Barriers that can be delivered in large quantities on short notice is the best solution for mitigating flood damage and destruction.

The Barrier Sharing Network is the solution. It is an intangible asset consisting of the software platform (that may be patentable) and the management thereof which can function worldwide and be managed from a central location. Like the Uber model, it is a high tech solution providing a simple and cost sharing solution to a complex problem.

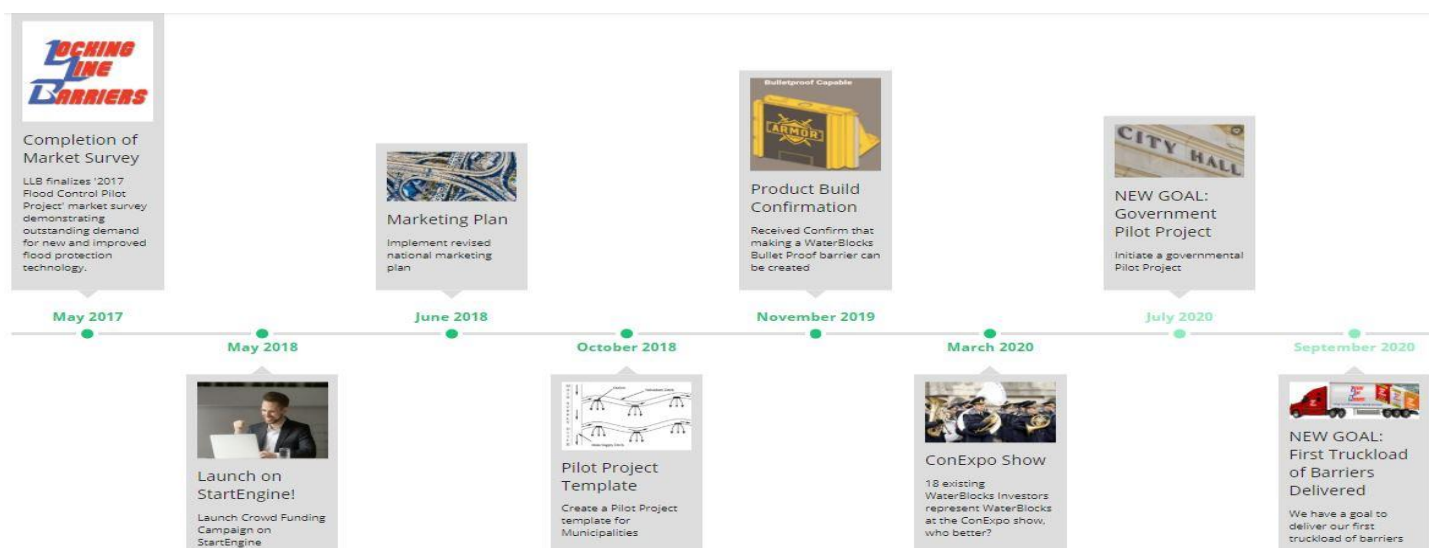

Network Members are enrolled: municipalities, major corporations, cities and states, shall agree as follows:

- To receive, distribute, store and care for the Barriers provided, until they are retrieved,
- To pay the shipping costs to deliver the Barriers requested if not provided by BSN,
- To report on the BSN web site the Barriers status changes / In Service or In Storage,
- To store the Barriers when not in use until the need for the Barriers arise elsewhere,
- During Storage the Barriers can be rented for other needs; Traffic and Crowd Control, and etc.
- Local Businesses and individuals in need simply contact their municipality for availability.

As each barrier has its own unique serial number BSN keeps track of the location of each unit and matches requests to current available inventory locations in real-time. BSN can arrange and manage the movement of the inventories to the point of need as requested.

The Company believes membership fees and related services in addition to barrier rentals will become a significant revenue stream in a relatively short period of time.

E. WaterBlocks™ – Marketing Forecast

WaterBlocks™ The Demand

Locking Line Barriers Corporation commissioned a detailed study of 36 respondents to evaluate market acceptance, need and overall demand for rapidly-deployable flood protection and multi-use barrier systems. The research resulted in these key findings:

- Market need & demand for flood barriers far exceeds the current availability of a sufficient supply
- Until WaterBlocks™ saturate the market, the need & demand will remain unfulfilled for the foreseeable future.

The Results are as follows:

It would take more than 800 Truckloads of WaterBlocks™ (808 to be exact, with 83.6 miles of barriers) to fulfill the demand for flood barrier systems - and that's just for the 36 respondents surveyed.

806 TruckLoads with an Adjusted Gross Profit of \$53,200 per truckload would result in \$42,879,200 Total AGP from the 36 respondents polled so far.

H. WaterBlocks™ – Current Status

The Company remains in a pre-operation and transition mode, pending the successful raise of sufficient capital to become operational. The affairs of the Company are being managed by Strategic Solutions Team, Inc. (SST) and led by their CEO, Joe Daniluk. The activities to date include: raising capital, marketing of both; the capital raising efforts and marketing responses to product inquiries, and maintaining the Company's private credit facility (PCF) in a current status. From time to time, SST has employed (2 or more as needed) independent contractors as needed to continue progressing forward. In this fashion, the Company has been able to minimize the costs and expenses necessary to keep the burn rate below \$20,000 per month.

The regulatory and economic impact of the CoronaVirus-19 pandemic has affected WaterBlocks timelines and its ability to complete certain business activities as rapidly as before. However, the Company continues to function with minimal financial impact as a result of the management services provided by SST. We believe as regulatory mandates diminish and the economy restarts our momentum will return and we can get back on our schedule.

MOMENTUM 2019:

- The Crowd Funding (CF) Offering continues to be successful reaching about \$250,000 from about 550 new investors. The proceeds from the rolling CF closes has provided sufficient funds to maintain the current status. An analysis of the time taken, our product production and promotional costs required, to achieve our success to date. The incorporation of a larger capital offering, this one is required for the purpose of providing an investment vehicle for accredited investors, financially capable of larger investments, who would normally not consider smaller CF offerings.
- Our manufacturer reported the first two molds were ordered and construction began. The Molds were completed and the first product prototypes were run in October and finished out in December.
- Two new product models were developed and added to our line; a low cost 'Crowd Control' barrier system and a Bullet-Proof barrier system for military use.
- The Company determined the best possible 'Product Launch' would be held at ConExpo, North America's largest manufacturer's trade show held in Las Vegas, NV in March 2020 to present the Company and its product line to the public for the first time. This show will have 120,000 visitors from around the globe.
- In November 2019, the Company was selected to be the 'featured start-up company' on a new nationally syndicated television show, Americas Next Investment. Filming was completed in January 2020, and airing on three national networks will commence in March 2020. (CV-19 has delayed this project until 7-25-20).
- February 2020 the first production run of Crowd Control barriers began in order to provide product samples and displays for ConExpo and other future marketing opportunities.

- Throughout the year of 2019, the following related events took place:
 - Global ‘Utility Patent(s)’ and TradeMark were filed,
 - Our web presence and marketing materials were upgraded and enhanced,
 - Three different Roto-molding companies with six separate facilities are on board to produce our product,
 - Negotiations with a Mold Making Firm, to produce the molds on a large enough scale to provide the mold tooling necessary to go globally are nearing completion,
 - We have three different companies under consideration to provide existing and proven software to accommodate our requirements for our Barrier Sharing Network,
 - We have several inquiries nationally and foreign for distribution rights,
 We have successfully reached a point to go to market.

2020 ould Prove to be a Very Productive Year.

What it means to be a Minority Holder

The only stock currently being offered hereby is Locking Line Barriers Corporation Preferred Stock Class A NON-voting Preferred Stock, please be advised: In our Company, the classes and voting structure of our stock has the effect of concentrating voting control with a few people, specifically the founders along with a small number of shareholders. As a result, these few people collectively have the ability to make all major decisions regarding the Company. As a minority holder of Locking Line Barriers Corporation's Preferred Stock Class A NON-voting preferred shares, you will have limited ability, if any at all, to influence company policies or any other corporate matter(s), including the election of directors, changes to the Company's governance documents, additional issuances of securities, company repurchases of securities, a sale of the Company or of assets of the Company, or transactions with related parties.

Dilution

The purchasers of these Cumulative Redeemable/Convertible Class A, Preferred Stock Shares offered by this Memorandum will experience no immediate or substantial dilution of their investments. In the event of a Common Class A Stock split or reverse split, prior to conversion, Conversion of Class A Preferred shares to Common Class A Shares, shall receive their proportionate share of Common Class A shares accordingly at the time of conversion.

Investors should understand the potential for dilution. Each Investor's stake in the Company, could be diluted due to the Company issuing additional shares. In other words, when the Company issues more shares, the percentage of the Company that you own will decrease, even though the value of the Company may increase. You will own a smaller piece of a larger company. This increase in number of shares outstanding could result from a stock offering (such as an initial public offering, another crowdfunding round, a venture capital round or angel investment), employees exercising stock options, or by conversion of certain instruments (e.g., convertible notes, preferred shares or warrants) into stock. If the company decides to issue more shares, an Investor could experience value dilution, with each share being worth less than before. There may also be earnings dilution, with a reduction in the amount earned per share (although this typically occurs only if the Company offers dividends, and most early stage companies are unlikely to offer dividends, preferring to invest any earnings into the Company). The type of dilution that hurts early-stage investors mostly occurs when the company sells more shares in a "down round," meaning at a lower valuation than in earlier offerings. If you are making an investment expecting to own a certain percentage of the Company or expecting each share to hold a certain amount of value, it is important to realize how the value of those shares can decrease by actions taken by the Company. Dilution can make drastic changes to the value of each share, ownership percentage, voting control, and earnings per share. PLEASE ensure you review other investment risks disclosed in our RISK DISCLOSURE Section, herein.

Transferability of securities

For a period of one year, the securities can only be resold: In an IPO; To the company; To an accredited investor; and To a member of the family of the purchaser or the equivalent, to a trust controlled by the purchaser, to a trust created for the benefit of a member of the family of the purchaser or the equivalent, or in connection with the death or close of the Offering. Shares are redeemable and do have conversion rights as described herein. The Shares to be issued upon completion of this Offering will be, fully paid and non-assessable. In the event of the dissolution, liquidation or winding up of the Company, the assets then legally available for distribution to the shareholders will be distributed ratably first to Preferred Shares among such shareholders in proportion to their Shares and then to other classes of shareholders.

J. Risk Disclosures and other Important Factors

Risk Disclosures: The SEC requires the Company to identify risks that are specific to its business and its financial condition. The Company is still subject to all the same risks that all companies in its business, and all companies in the economy, are exposed to. These include risks relating to economic downturns, political and economic events and technological developments. Additionally, early-stage companies are inherently more risky than more developed companies. You should consider general risks as well as specific risks when deciding whether to invest. These are the principal risks that relate to the Company and its business:

Competitive Risks: Once the product is in use, we anticipate many 'copycats' may try to redesign the basic concepts and attempt to compete with this product. Patent infringement and development costs may deter such attempts. LLB believes, once the Barrier Sharing Network is operational, this network service will negatively impact the 'copycat profitability equation', as an investment in a costly competitive product that is readily available through the Network at a reduced effective cost may thwart copycats.

Marketing and Sales Risks: There has been no similar product or related advertising scheme on the market in the US prior to 2016. Consequently, there is no data upon which to formulate metrics for company valuations, marketing, sales and profitability, analysis or other common types of investment due diligence. All projections and forward-looking statements contained herein are simply estimates the company believes to be reasonable. Standalone sales of the product, without advertising, will take place primarily with government agencies, where ownership and control of the product is more important than the cost factor. This may also be true for some large corporations. We anticipate less than 40% of our revenue will come from this source of sales during the first three years of operations, due to the lag time normally encountered with such organizations to execute such a purchase. Our target market is other municipalities, agencies and other business enterprises which have an interest in a cost sharing networking methodology for the acquisition of disaster support equipment. We will be relying on need versus cost for the successful marketing of our Products and Network memberships. Membership fees and nominal equipment rental charges are anticipated to provide only an estimated 10-15% of our revenue during our first three years of operations. All sales of the WaterBlocks product line must, contractually, come through LLB. We anticipate the bulk of our sales and revenues to be generated from our marketing efforts and the marketing efforts of our affiliates and future distributors. This would include the sale of "Barrier Sharing Network Revenue Sharing Agreements" by and through LLB and its affiliates. There having been no such sales or efforts to sell revenue sharing agreements to date, LLB is unable to provide any reliable forecast or expectation regarding the viability of such sales. Advertising Sales to sponsors and donors is estimated to generate 10-15% of the company's revenue. It is possible the company could completely fail in this marketing endeavor. The company has no previous experience in selling or marketing advertising. There are no competitive similarities to this advertising medium, or any other known facts to formulate standard advertising industry sales metrics as to impressions or cost per impression. Such advertising sales will remain conceptual, for the most part, until such time as the barriers are shown working and controlling floodwaters on national news. The only factor making such sales conceivable is the low advertising cost/rate when amortized over the life of the product and the advertisement thereon.

Ordinary, normal and common startup company Risks: This Company is a Startup. It is a high-risk venture, an unknown undertaking that will be subject to all the risks experienced by any new startup company. There are no known management personnel available with previous experience in this specific endeavor. There are no known competitors to provide related comparisons. The one and only known factor available to the Company is the "Demand for such a product and rental service", which is enormous. The challenge is the Company's ability to bring the product and service to market successfully.

The company depends on two primary product lines (Crowd Control and Flood Control Barriers, and related services to start: Others will be developed and added as the opportunities to do so permit.

The company's primary product is the WaterBlocks Product Line. Although it is developing other products, the company's survival in the near term depends upon being able to sell or rent the WaterBlocks in sufficient quantities to make a profit.

The delivery of the Company's product line is dependent upon third-party manufacturers. The company's primary product is manufactured by third parties. The Company, by Contract is required to purchase the product from the licensed exclusive Manufacturer and must rely on the manufacturer for the products and related warranties. Difficulties encountered by the manufacturer may result in the inability to deliver product or in a timely manner, the Company may be impacted. The exclusive Manufacturer is owned and controlled by WaterBlocks CEO, Joseph Daniluk.

If the company is unable to raise sufficient funding. It will not succeed. There can be no assurance that the company will meet our projections, goals objectives and/or our capital requirements. There is no assurance that the Company will be successful raising the capital necessary to succeed. There can be no assurance that there will be sufficient acceptance and sales of the product to succeed.

The company is controlled by its CEO LLB's CEO who also controls the ownership of the intellectual property rights, Great American Holdings, Inc., and Manufacturing Contractors, Inc., the exclusive manufacturer of the WaterBlocks product line.

Patent / Intellectual Property License Risks: Locking Line Barriers Corporation, LLB's, only intellectual property rights are those rights conveyed in the Global Distribution and Licensing Agreement. LLB has no other rights to or in the intellectual property related to the "WaterBlocks" project. LLB has a legal obligation under its license agreement to pay all related costs and expenses to develop, expand and protect the existing intellectual property rights in consideration of having the control of the expansion of the intellectual property rights and the exploitation thereof globally. The related Product License(s) we rely on for various underlying intellectual property rights in order to minimize competitive impact on the operation our business including pending patents, may not be sufficiently broad or otherwise may not result in a significant competitive advantage. In addition, the steps that we are required to take to maintain and protect the intellectual property rights may not prevent our rights from being challenged, invalidated, circumvented or designed-around, particularly in countries where intellectual property rights are not highly developed or protected. In some circumstances, enforcement may not be available to us because an infringer has a dominant intellectual property position or for other business reasons. Any failure by the Company to obtain or maintain intellectual property rights that convey competitive advantage, adequately protect the intellectual property or detect or prevent circumvention or unauthorized use of such property, could adversely impact our competitive position and results of operations. We also rely on nondisclosure and noncompetition agreements with vendors, consultants and other parties to protect, in part, trade secrets and other proprietary rights. There can be no assurance that these agreements will adequately protect our trade secrets and other proprietary rights and will not be breached, that we will have adequate remedies for any breach, that others will not independently develop substantially equivalent proprietary information or that third parties will not otherwise gain access to our trade secrets or other proprietary rights. As we expand our business, protecting the intellectual property rights will become increasingly important. The protective steps we have taken may be inadequate to deter competitors from using the proprietary information. In order to protect or enforce our intellectual property rights, we may be required to initiate litigation against third parties, such as infringement lawsuit(s). Further, these third parties may assert claims against us with or without provocation. Such lawsuits could be expensive, take significant time and could divert management's attention from other business concerns. The law relating to the scope and validity of claims in the technology field in which we operate is still evolving and, consequently, intellectual property positions in our industry are generally uncertain. We cannot assure you that we will prevail in any of these potential suits or that the damages or other remedies awarded, if any, would be commercially valuable. Patent, processes, maintenance and infringement enforcement costs could be significant as the product is expanded to other countries. Many of the patent pending accouterments claimed could be rejected by the examiners, which won't be known for some time.

General Start Up Business Risks: Locking Line Barriers Corporation, LLB, is a StartUp, it has no transactional history. It only possesses a License to develop and market a new idea, which has no comparable to rely upon for data or guidance on how to proceed. Certain other RISKS may exist and remain unknown or unforeseen and thereby not specified in this offering. Therefore, there are no guarantees of any kind that the business can succeed and prosper. The Company and its Team can only put forth its Best Efforts to proceed in accordance with this offering and representations.

K. OTHER Risk Factors

Investing in the Company's Shares is very risky. You should be able to bear a complete loss of your investment. You should carefully consider the following factors, including those listed in the accompanying business plan.

Further, the Company has no way to determine and/or forecast the effects of the CoronaVirus-19 pandemic on its business specifically or in general. The only thing we know for certain is that CoronaVirus-19 cannot stop future flooding and any other natural disasters.

Unanticipated obstacles may hinder the execution of the Company's business plan.

Because of the number and range of the assumptions underlying our projections and forward-looking statements, many of which are subject to significant uncertainties and contingencies that are beyond our reasonable control, some of the assumptions inevitably will not materialize and unanticipated obstacles may occur subsequent to the date of this offering, including:

- The affects and impact of the Covid-19 on the economy and on our business operations;
- Our prospective clients may suffer downturns, financial instability or budget cuts;
- Our failure to develop and introduce new products due to insufficient capital resources;
- Our inability to produce sufficient quantities of products due to insufficient capital;

- Adverse changes affecting our suppliers and other third-party service providers;
- Adverse Governmental Rules, Regulations and/or executive orders related to CV-19
- Adverse changes in business or macroeconomic conditions from regulatory changes.

The occurrence of any of these unanticipated obstacles will hinder the execution of our business plan and adversely affect our operating results. And further, may require immediate changes and modifications to our business plans.

Our financial results will fluctuate in the future, which makes them difficult to predict.

Seed Capital Stage - Start Up Business

Locking Line Barriers Corporation, is organized as an ‘C’ Corporation under the laws of the State of Colorado. The Company expanded its Board in December 2017 and elected to begin raising the capital necessary to begin operations. It has only a limited history upon which an evaluation of its prospects and future performance can be made. The Company’s proposed operations are subject to all business risks associated with new enterprises. The likelihood of the Company’s success must be considered in light of the problems, expenses, difficulties, complications, and delays frequently encountered in connection with the expansion of a new business, operation in a competitive industry, and the continued development of advertising, promotions and developing a corresponding customer base. There is a possibility that the Company could sustain losses in the future. There can be no assurances that the Company will ever operate profitably.

Inadequacy of Funds

If certain assumptions contained in Management’s business plans prove to be incorrect, the Company may have inadequate funds to fully develop its business and may need debt financing or other capital investment to fully implement the Company’s business plans. The Company is relying on the Private Credit Facility (PCF) described herein to financially support its transition to full operations in addition to the capital it raises. The PCF is provided by credit providers through a number of persons and entities related to the company and/or its CEO. The PCF could lose one or more of its credit providers at any time, for any or no reason. Such an event may create a burden or even jeopardize the entire PCF, and thereby the ongoing progress of the Company. Every effort is made to keep the status and operation of the PCF in good standing. The Company intends to retire the PCF as noted in the use of proceeds herein and keep the PCF in reserve for the foreseeable future.

Dependence on Management

In the early stages of development, the Company’s business will be significantly dependent on the Company’s management team. The Company’s success will be particularly dependent upon: Joe Daniluk, CEO. The loss of any one of these individuals could have a material adverse effect on the Company. Management staffing will begin upon starting operations as funding becomes available.

Trend in Consumer Preferences and Spending

The Company’s operating results may fluctuate significantly from period to period as a result of a variety of factors, including purchasing patterns of customers, competitive pricing, debt service and principal reduction payments, and general economic conditions. There is no assurance that the Company will be successful in marketing any of its products, or that the revenues from the sale of such products will be significant or sufficient. Consequently, the Company’s revenues may vary significantly by quarter, and the Company’s operating results may experience extreme fluctuations.

Risks of Borrowing

When the Company incurs indebtedness, a portion of its cash flow will have to be dedicated to the payment of principal and interest on such indebtedness including the existing PCF. Typical loan agreements also might contain restrictive covenants, which may impair the Company’s operating flexibility. Such loan agreements could also provide for default under certain circumstances, such as failure to meet certain financial covenants. A default under a loan agreement could result in the loan becoming immediately due and payable and, if unpaid, a judgment in favor of such lender which would be senior to the rights of shareholders of the Company. A judgment creditor would have the right to foreclose on any of the Company’s assets resulting in a material adverse effect on the Company’s business, operating results or financial condition.

Weather Trends

The Company anticipates weather to be a major factor affecting revenues and profits. The Company may experience seasonal cycles that impact revenues and profits on a recurring basis.

Unanticipated Obstacles to Execution of the Business Plan

The Company's business plans may change significantly. Many of the Company's potential business endeavors are capital intensive and may be subject to statutory or regulatory requirements. Management believes that the Company's chosen activities and strategies are achievable in light of current economic and legal conditions with the skills, background, and knowledge of the Company's principals and advisors. Management reserves the right to make significant modifications to the Company's stated strategies and plans depending on future events.

Management Discretion as to Use of Proceeds

The net proceeds from this Offering will be used for the purposes described under "Use of Proceeds." The Company reserves the right to use the funds obtained from this Offering for other similar purposes not presently contemplated which it deems to be in the best interests of the Company and its shareholders in order to address changing circumstances and/or opportunities. As a result of the foregoing, the success of the Company will be substantially dependent upon the discretion and judgment of Management with respect to application and allocation of the net proceeds of this Offering. Investors for the Shares offered hereby will be entrusting their funds to the Company's Management, upon whose judgment and discretion investors must depend and accept.

The Company has broad discretion as to how to spend the proceeds from this offering and may spend these proceeds in ways in which you may not agree. We currently intend to use the proceeds of this offering to fund further expansion and for other working capital and general corporate purposes. While we expect to use the proceeds of this offering as described in this memorandum, we may use the remaining proceeds for other purposes. There can be no assurance that any investment of the proceeds will yield a favorable return, or any return at all.

Risks Associated with Expansion

The Company plans on expanding its business through the introduction of a sophisticated marketing campaign. Any expansion of operations the Company may undertake will entail risks. Such actions may involve specific operational activities, which may negatively impact the profitability of the Company. Consequently, shareholders must assume the risk that (i) such expansion may ultimately involve expenditures of funds beyond the resources available to the Company at that time, and (ii) management of such expanded operations may divert Management's attention and resources away from its existing operations, all of which factors may have a material adverse effect on the Company's present and prospective business activities.

In order to fund future growth and development, the Company will probably need to raise additional funds in the future by offering shares of its preferred stock and/or other classes of equity or debt that convert into shares of preferred or common stock, any of which offerings would dilute the ownership percentage of investors in this offering.

Control by Management

As of May 21, 2018, the Company's Directors, Executive Officers and other related Shareholders owned approximately 100% of the Company's outstanding Common voting Shares. Upon completion of this Offering, the Company's Directors, Executive Officers and other Shareholders will still own approximately 87+% of the issued and outstanding Common voting Shares, and will be able to continue to control the Company. Investor, preferred shareholders will own a minority percentage of the Company and will have no voting rights until converted to common shares. Investors will not have the ability to control the Company's Shareholders, Directors and/or Executive Officers. We expect to raise additional capital through equity and/or debt offerings and to provide our employees with equity incentives. Therefore, your ownership interest in the Company is likely to continue to be diluted and subordinated. However, such additional capital should in most cases increase the value of the company which may offset the impact of the dilution.

Return of Profits

The Company intends to retain any initial future earnings to fund operations and expand the Company's business while building financial strength. Common shareholders will be entitled to receive revenue profits as Dividends proportionate to the number of Shares held by that shareholder, only when the Company's Board of Directors establishes a profit distribution and dividend plan based upon the Company's results of operations, financial condition, capital requirements, and other circumstances from time to time.

No Assurances of Protection for Proprietary Rights; Reliance on Trade Secrets

In certain cases, the Company may rely on trade secrets to protect intellectual property, proprietary technology and processes, which the Company has acquired, developed or may develop in the future. There can be no assurances that secrecy obligations will be honored or that others will not independently develop similar or superior products or technology. The protection of intellectual property and/or proprietary technology through claims of trade secret status has been the subject of increasing claims and litigation by various companies both in order to protect proprietary rights as well as for competitive reasons even where proprietary claims are unsubstantiated. The prosecution of proprietary claims or the defense of such claims is costly and uncertain given the uncertainty and rapid development of the principles of law pertaining to this area. The Company, in common with other firms, may also be subject to claims by other parties with regard to the use of intellectual property, technology information and data, which may be deemed proprietary to others.

Limited Transferability and Liquidity

To satisfy the requirements of certain exemptions from registration under the Securities Act, and to conform with applicable state securities laws, each investor must acquire his Shares for investment purposes only and not with a view towards distribution. Consequently, certain conditions of the Securities Act may need to be satisfied prior to any sale, transfer, or other disposition of the Shares. Some of these conditions may include a minimum holding period, availability of certain reports, including financial statements from Locking Line Barriers Corporation, limitations on the percentage of Shares sold and the manner in which they are sold. The Company can prohibit any sale, transfer or disposition unless it receives an opinion of counsel provided at the holder's expense, in a form satisfactory to Locking Line Barriers Corporation, stating that the proposed sale, transfer or other disposition will not result in a violation of applicable federal or state securities laws and regulations. No public market exists for the Shares and no market is expected to develop. Consequently, owners of the Shares may have to hold their investment indefinitely and may not be able to liquidate their investments in Locking Line Barriers Corporation or pledge them as collateral for a loan in the event of an emergency.

Broker - Dealer Sales of Shares

The Company's Capital Stock Shares are not presently included for trading on any exchange, and there can be no assurances that the Company will ultimately be registered on any exchange. The NASDAQ Stock Market, Inc. has recently enacted certain changes to the entry and maintenance criteria for listing eligibility on the NASDAQ SmallCap Market. The entry standards require at least \$4 million in net tangible assets or \$750,000 net income in two of the last three years. The proposed entry standards would also require a public float of at least 1 million shares, \$5 million value of public float, a minimum bid price of \$2.00 per share, at least three market makers, and at least 300 shareholders. The maintenance standards (as opposed to entry standards) require at least \$2 million in net tangible assets or \$500,000 in net income in two of the last three years, a public float of at least 500,000 shares, a \$1 million market value of public float, a minimum bid price of \$1.00 per share, at least two market makers, and at least 300 shareholders. No assurance can be given that the Common Stock Share of the Company will ever qualify for inclusion on the NASDAQ System or any other trading market until such time as Management deems it necessary. As a result, the Company's Capital Stock Shares are covered by a Securities and Exchange Commission rule that opposes additional sales practice requirements on broker-dealers who sell such securities to persons other than established customers and accredited investors. For transactions covered by the rule, the broker-dealer must make a special suitability determination for the purchaser and receive the purchaser's written agreement to the transaction prior to the sale. Consequently, the rule may affect the ability of broker-dealers to sell the Company's securities and affect the ability of shareholders to sell their Shares in the secondary market.

Dilution

Purchasers of Shares will experience NO immediate and/or substantial dilution in net tangible book value per share. Additional Shares issued by the Company in the future may and probably will dilute a purchaser's investment in the purchased shares particularly in the event of Preferred Stock Conversions to Common shares, which remains unknown.

Long Term Nature of Investment

An investment in the Shares may be long term and illiquid. As discussed above, the offer and sale of the Shares will not be registered under the Securities Act or any foreign or state securities laws by reason of exemptions from such registration, which depends in part on the investment intent of the investors. Prospective investors will be required to represent in writing that they are purchasing the Shares for their own account for long-term investment and not with a view towards resale or distribution. Accordingly, purchasers of Shares must be willing and able to bear the economic risk of their investment for an indefinite period of time. It is likely that investors will not be able to liquidate their investment in the event of an emergency.

Compliance with Securities Laws

The Shares are being offered for sale in reliance upon certain exemptions from the registration requirements of the Securities Act, applicable Colorado Securities Laws, and other applicable state securities laws. If the sale of Shares were to fail to qualify for these exemptions, purchasers may seek rescission of their purchases of Shares. If a number of purchasers were to obtain rescission, the Company would face significant financial demands, which could adversely affect the Company as a whole, as well as any non-rescinding purchasers.

Projections: Forward Looking Information

Management has prepared projections regarding the Company's anticipated financial performance. The Company's projections are hypothetical and based upon a presumed financial performance of the Company, the addition of a sophisticated and well-funded marketing plan, and other factors influencing the business of the Company, all of which have been impacted by the CoronaVirus-19 pandemic. The projections are based on Management's best estimate of the probable results of operations of the Company, based on present circumstances, and have not been reviewed by the Company's independent accountants. These projections are based on several assumptions, set forth therein, which Management believes are reasonable. Some assumptions, upon which the projections are based, however, invariably will not materialize due the inevitable occurrence of unanticipated events and circumstances beyond Management's control. Therefore, actual results of operations will vary from the projections, and such variances may be material. Assumptions regarding future changes in sales and revenues are necessarily speculative in nature. In addition, projections do not and cannot take into account such factors as general economic conditions, CoronaVirus-19 pandemic, unforeseen regulatory changes, the entry into the Company's market by additional competitors, the terms and conditions of future capitalization, and other risks inherent to the Company's business. While Management believes that the projections accurately reflect possible future results of the Company's operations, those results cannot be and are not guaranteed.

Lack of Firm Underwriter

The Shares offered hereby are on a "best efforts" basis by the Management of the Company without compensation, and on a "best efforts" basis through certain FINRA registered broker-dealers, which enter into Participating Broker-Dealer Agreements with the Company. Accordingly, there is no assurance that the Company, or any FINRA broker-dealer, will sell the maximum Shares offered or any lesser amount.

No Current Market For Shares

There is no current market for the Shares offered in this Private Offering and no market is expected to develop in the near future.

Irregular Use of Proceeds

The Company will incur Irregular Use of Proceeds that may include but are not limited to the following over \$1,000: Vendor payments, and compensation or salary made to one's self, a friend or relative; any expense labeled "Administration Expenses" that is not strictly for administrative purposes; any expense labeled; "Travel and Entertainment"; any expense that is for the purposes of inter-company – "related party" debt, back or current payments. Further, the Company being a Start-Up business with no assets, cash flow or transactional history is unable to establish conventional credit. The Company has developed and will expand what it refers to as "Private Credit Facility (PCF)" defined for accounting and operational purposes as "PCF Debit and Credit Transactions" received from or payable to; vendors, investors, organizations, related parties, and others, who may provide effectively; credit and/or funds in kind, to the Company, as may be needed from time to time, requiring repayment in relatively short time periods. Such repayments may come from and become part of the use of proceeds.

Recent Offerings of Securities and impact on valuation

The Company is actively accepting investments via its Title III - Regulation Crowdfunding Campaign to raise a maximum of \$1.07m at <https://www.startengine.com/llbusa> for its Class B Non-Voting Common Shares at a price of \$2.00 per share. To date over 735+ unrelated investors have purchased these shares at the offering price in an amount exceeding \$333,532.00 for paid shares. Management may elect to terminate this offering prior to reaching its goal if circumstances necessitate such action.

Pre Money Valuation: \$18,000,000.00

The Pre-Money Valuation has been formulated in accordance with SEC guidelines, as follows: ((Total Shares Issued – Treasury Shares) X Offering Price)) = Valuation (9,000,000 X \$2.00) = \$18,000,000 and further; We have not undertaken any efforts to produce a valuation of the Company. The Board of Directors determined that a Price of \$2.00 per share was a reasonable sale price of the outstanding Shares held in Treasury for this offering. Valuation Discussion: The price of the shares merely reflects the opinion of the Company as to what could be the fair market value. When incorporating "Blue Sky" value of the Intangible Assets, including, but not limited to; three years of R&D, licenses and related trademark rights, web site and marketing tools and copyrights, and revenue potential. **The actual value can only be determined when a willing purchaser pays and the seller accepts the price offered.** Financial Statement correlation; the CEO elected to value the Company's Intangible Assets at \$0.00 as no reasonable valuation formulation could be determined. The single most important intangible asset of the company is its 20 year Global Marketing License for the WaterBlocks product line and at the time financial statement were prepared no comparative valuation could be found. The Company believes that this license will result in a minimum average CTOE (cash throw off to equity) of \$2m annually over the first 20 years of the license. Our mathematical analysis, for a Discounted Future Value of the CTOE; using the 20 Year Life of the Global Distribution License, a forecast of an average \$2M annually in CTOE, discounted at 10%, results in a Present Value of \$23.8M; Source; "Motley Fool – xcalc". Conclusion: In considering the value of the Company's unrestricted Global Distribution License we included the only similar comparable we have found. The recent article disclosing Nestle's purchase of the restricted by market segment, Global Distribution Rights from Starbucks. Insufficient data precludes a comparative analysis, but the transaction does shed some light on the value of Global Distribution Rights. Article Source "The Denver Post, May 8, 2018, page 15 by AP NESTLE TAKES OVER SALES OF STARBUCKS IN GROCERY AISLES Seattle: Nestle is paying more than \$7 billion to buy the rights to sell Starbucks coffee and tea in supermarkets and other stores outside its coffee shops. The deal comes with a huge price tag for Nestle, but it could pay off big for the Swiss company. Its Nescafe and Nespresso don't carry anywhere near the heft in America that the Starbucks brand does, with its \$2 billion in annual sales. Nestle will also put Starbucks in grocery stores outside the U.S. and Canada. The deal gives Nestle the rights to market, sell and distribute bags of Starbucks coffee beans, as well as its instant coffee. Nestle will also sell other brands owned by Starbucks, such as Seattle's Best Coffee, Teavana tea and Torrefazi One Italia coffee, and will be allowed to put the Starbucks brand on Nestle single-serve capsules for coffee machines."

Indebtedness

The Company's has one liability for a short term loan of \$11,000.00 and no other lawful debt. It has no Payroll expenses paid to date. It does have unspecified Contingent Liabilities consisting of approximately of and estimated balance of \$175,000.00 of PCF advances utilized. And compensation for its entire Management Team which has performed for little or no consideration to date, this liability will eventually be resolved individually for cash and/or equity once the Company becomes operational.

Offering Price

The price of the Shares offered herein has been arbitrarily established by the Company, considering such matters as the state of the Company's business development and the general condition of the industry in which it will operate. The Offering price bears little or no relationship to the assets, net worth, or any other objective criteria of value applicable to the Company.

General Economic Conditions

The financial success of the Company may be sensitive to adverse changes in general economic conditions in the United States, such as recession, inflation, unemployment, interest rates, and the CoronaVirus-19 pandemic. Such changing conditions could reduce demand in the marketplace for the Company's products. Management believes that the impending growth of the mainstream market acceptance, and the primary hardware product line of WaterBlocks will insulate the Company from extreme reduced demand. Nevertheless, the Company has no control over these factors.

Transfer Agent and Registrar

The Company will act as its own transfer agent and registrar for the Shares of ownership issued hereby. The Company may employ a Registrar in the future.

L. Plan of Placement

The Shares are offered directly by the Management of the Company on the terms and conditions set forth in this Memorandum. FINRA brokers and dealers may also offer Shares. COMPANY'S CURRENT STATUS REPORT TO SHAREHOLDERS FEBRUARY 28, 2020

Annual Shareholder Meeting Address
February 28, 2020

From the Desk of
Joseph Daniluk
Chairman of the Board

Good day everyone. I have exciting news to share with our incredible Investor Team, our shareholders, now over 550 strong.

First let me address the elephant in the room. Admittedly, the coronavirus is having a negative impact on both the global economy and the stock market. The question, how does this impact WaterBlocks?

We believe the impact on WaterBlocks will not be significant for the following reasons:

1. We do not have a large capital burn rate at this time.
2. We have not gone operational and begun actual tool building, manufacturing, so no plants will be shut down, sold products undeliverable, and related losses realized.
3. The market is vast: Flooding will continue to happen and our barriers will be needed worldwide.
4. We are launching our Brand, our Product, and our Company to the world:
 - a. The ConExpo show will introduce our product to a vast array of major corporations and government agencies.
 - b. We will be featured on a new TV show: "America's Next Investment," airing on either CNBC or Fox during the first two weeks in March.

Now, let's look at milestones we achieved in 2019:

1. Negotiations with a mold manufacturing firm are nearing completion. (They will produce the molds / tooling on a large scale, enabling WaterBlocks to expand Globally.)
2. Three different Roto-molding companies with six separate facilities are on board in the US to produce our product.
3. We have both national and foreign inquiries for distribution rights.
4. Both Global Utility Patents and a Trade Mark were filed.
5. An additional \$5,000,000 private placement stock offering for accredited investors is underway. Running simultaneously with our ongoing Crowdfunding offering, which will get things moving faster and bigger.

Our progress in 2019 puts us in a good position to begin making plans for the transition of the company from a startup to a fully operational company.

Your support and participation made our efforts in 2019 a smashing success and I **ThankYou**, our shareholders and our management team for our progress. You are all incredible!

My warmest regards,
Joe Daniluk,
Chairman and CEO

THANK YOU for Your Time and Consideration!

END-PPM.

ARTICLE I MEETING OF SHAREHOLDERS

Section 1.1. Annual Meeting. The annual meeting of the shareholders shall be held during January of each year or on such other day as shall be fixed by the Board of Directors. If that day should not be a regular business day, then the meeting shall be held on the next following business day. At this meeting, the shareholders shall elect a Board of Directors for the ensuing year and transact other business as shall properly come before such meeting. If the election of directors shall not be held on the day designated for the annual meeting, or at any adjournment thereof, the Board of Directors shall cause the election to be held at a special meeting of the shareholders as soon thereafter as may be convenient.

Section 1.2. Place of Meetings. Each meeting of the shareholders shall be held at such place, either within or outside Colorado, as may be designated in the notice of meeting, or, if no place is designated in the notice, at the principal office of the Corporation if in Colorado, or if not, at the registered office of the Corporation in Colorado.

Section 1.3. Special Meetings. Special meetings of the shareholders may be called for any purpose or purposes by the President or by the Board of Directors, and shall be called by the President at the request of the holders of not less than one-tenth of all outstanding shares of the Corporation entitled to vote at the meeting.

Section 1.4. Notice of Meetings. Written notice of meetings shall be delivered not less than ten nor more than fifty days before the date of the meeting to be called. Written notice shall normally be delivered in ten days except in cases of extraordinary actions being proposed by the Corporation or unless otherwise provided by applicable Colorado law. If a special meeting is being called, the notice shall state the purpose or purposes of the meeting. Notice shall be addressed to the shareholder at the address that appears on the stock transfer books of the Corporation. If three successive letters mailed to the last known address of any shareholder, as contained in the stock transfer books, are returned, no further notice shall be necessary with respect to any meeting until another address is made known to the Corporation. Notice need not be given to any shareholder who shall waive notice of any meeting in writing, whether before, at, or after the meeting, or who shall attend the meeting except for the purpose of making a record of objection to any lack of proper notice to such shareholder.

Section 1.5. Quorum and Adjournment. At any meeting of the shareholders, the presence, in person or by proxy, of the holders of a majority of the shares outstanding and entitled to vote at such meeting shall constitute a quorum. In the absence of a quorum, the meeting may be adjourned for a period not to exceed thirty days, without further notice, by any officer entitled to preside at or act as Secretary of such meeting, or by a majority in interest of those shareholders present in person or by proxy. The withdrawal of enough shareholders to leave less than a quorum shall not prevent the remaining shareholders from continuing to transact business until adjournment.

Section 1.6. Voting. At each meeting of the shareholders, those shareholders entitled to vote may vote in person or by proxy. The record date for the determination of the shareholders shall be the date upon which notice of the meeting was sent to the shareholders, unless a different date therefore was fixed by the Board of Directors. A proxy, to be valid, must be executed in writing by the shareholder or by a duly authorized attorney-in-fact. No proxy shall be valid after eleven months from the date of its execution unless otherwise provided in the proxy, subject to applicable Colorado law. At all meetings of the shareholders at which a quorum is present, all matters shall be decided by a simple majority vote of all then eligible shares for which votes are cast on the matter, except as otherwise provided by statute or by the Articles of Incorporation. The vote on any matter need not be by ballot unless required by statute or requested by a shareholder, in person or by proxy, who is entitled to vote at the meeting.

Section 1.7. Proxies. At any meeting of the shareholders, a shareholder may vote by proxy executed in writing by the shareholder or a duly authorized attorney-in-fact. Such proxy shall be filed with the Secretary of the Corporation before or at the time of the meeting. No proxy shall be valid after eleven months from the date of its execution, unless otherwise provided in the proxy, subject to the requirements of Colorado law.

Section 1.8. Conduct of Meetings. Each meeting of the shareholders shall be presided over by the Chairman of the Board of Directors, or if absent, by the President, or if absent, by any Vice President. If the Chairman of the Board, President, and Vice Presidents are all absent, a Chairman of the meeting shall be chosen by a majority in voting interest of those shareholders entitled to vote who are present or represented by proxy. The Secretary of the Corporation shall act as Secretary of each meeting of the shareholders. If the Secretary is absent, the Chairman of the meeting shall appoint a Secretary for the meeting.

Section 1.9. Action Without A Meeting. Action which may be taken at a meeting of the shareholders may be taken without a meeting pursuant to applicable Colorado law, if a consent in writing setting forth the action so taken is signed by all of the shareholders entitled to vote with respect to the subject matter thereof. Such consent shall have the same force and effect as a unanimous vote of the shareholders for any purpose.

ARTICLE II **BOARD OF DIRECTORS**

Section 2.1. Powers. The property and business of the Corporation shall be managed by its Board of Directors, which may exercise all powers of the Corporation and do all lawful acts as are not by statute, by the Articles of Incorporation, or by these Bylaws directed or required to be exercised or done by the shareholders. The directors shall also have authority to elect and discharge the officers of the Corporation and pass on any and all claims of such officers for salaries or other compensation, and may contract with such officers, employees, directors, and other persons rendering service to the Corporation with respect to their salaries and other compensation.

Section 2.2. Performance of Duties. A director of the Corporation shall perform the duties of a director, including the duties as a member of any committee of the Board on which such director may serve, in good faith, in a manner the director reasonably believes to be in the best interests of the corporation, and with such care as an ordinarily prudent person in a like position would use under similar circumstances. In performing such duties, a director shall be entitled to rely upon information, opinions, reports, and statements, including financial data, prepared or presented by persons or groups listed in subparagraphs (a), (b), and (c) of this Section 2.2, but the director shall not be considered to be acting in good faith if the director has knowledge concerning the matter in question that would cause such reliance to be unwarranted. A person who so performs such duties as director shall not have any liability by reason of being or having been a director of the Corporation. Those groups or persons upon whose information, opinions, reports, or statements a director is entitled to rely are as follows:

- (a) Officers and employees of the Corporation whom the director reasonably believes to be reliable and competent in the matters presented;
- (b) Counsel, accountants, and other such persons as to matters which the director reasonably believes to be within such persons professional or expert competence; and
- (c) A committee of the Board on which the director does not serve as to matters within its designated authority, which committee the director reasonably believes to merit confidence.

Section 2.3. Number, Tenure, and Election. The Board of Directors shall consist of such number of directors as shall be fixed from time to time by the Board of Directors, but in no instance shall there be less than the number required by law. For such periods of time during which there are less than three shareholders of the Corporation, the number of directors shall be equal to the number of shareholders, unless the Board determines otherwise. The directors shall be elected at the annual meeting of shareholders and shall hold office until the next annual meeting of shareholders or until their successors are elected and qualified. The Board of Directors may appoint one of its members to act as Chairman of the Board of Directors.

Section 2.4. Committees. The Board of Directors may appoint a committee or committees of one or more of its members with such powers as may be legally delegated by the Board. In all cases, such committee or committees shall act as a Board regularly convened and may adopt such rules and regulations for the conduct of their meetings and the management of the Corporation as may be deemed proper and not inconsistent with statute, the Articles of Incorporation, or these Bylaws.

Section 2.5. Resignations. A director may resign at any time by giving written notice to the Board of Directors, President, or Secretary of the Corporation. The resignation shall take effect upon the date of receipt of such notice, or at any later time specified therein. The acceptance of such resignation shall not be necessary to make it effective unless the resignation so requires.

Section 2.6. Removal. At any shareholders' meeting called expressly for that purpose, the entire Board of Directors or any lesser number may be removed, with or without cause, by a vote of a majority of the shares then entitled to vote at any election of directors, or, if cumulative voting is in effect for the election of directors, by a vote of shares then entitled to vote at any election of directors which is suffice under Colorado law for such removal.

Section 2.7. Vacancies. Any vacancy occurring in the Board of Directors may be filled by the affirmative vote of a majority of the remaining directors though less than a quorum. A director elected to fill a vacancy shall be elected for the unexpired portion of the term of his predecessor. Any directorship to be filled by reason of an increase in the number of directors shall be filled by the affirmative vote of a majority of the directors then in office, by election at an annual meeting of the shareholders, or by election at a special meeting of the shareholders called for that purpose. A director chosen to fill a position resulting from an increase in the number of directors shall hold office until the next annual meeting of shareholders or until a successor shall have been elected and qualified.

Section 2.8. Compensation. By resolution of the Board of Directors and irrespective of any personal interest of any of its members, each director may be paid the expenses of attending each meeting of the Board. A director may, in addition, be paid a salary as director or a fixed sum for attendance at each meeting of the Board and its committees, or both. A director may serve the Corporation in another capacity and receive compensation for the services rendered in that capacity in addition.

Section 2.9. Place of Meetings. The Board of Directors may hold its meetings at any place within or without the State of Colorado that it may from time to time specify by resolution.

Section 2.10. Annual Meetings. The annual meeting of the Board of Directors shall immediately follow the annual meeting of the shareholders and be held at the same place as such annual shareholders' meeting.

Section 2.11. Special Meetings. Special meetings of the Board of Directors may be called at any time for any purpose by or at the request of the President or any director. Written notice of each special meeting, setting forth the time and place of the meeting shall be given to each director at least twenty-four hours before the meeting. This notice may be given either personally, through the United States Mail, or by prepaid telegram to the address of each director appearing on the books of the Corporation. Any meeting of the Board of Directors, whether regular or special, shall be a legal meeting if a majority of the directors shall be present, in person or by means of communications device, or shall sign the minutes, whether or not notice was properly given.

Section 2.12. Meetings in General. Attendance at a meeting shall constitute a waiver of notice thereof, except when a director attends a meeting for the express and sole purpose of objecting to the transaction of any business because the meeting is not lawfully called or convened. Neither the business to be transacted at, nor the purpose of, any annual, regular, or special meeting of the Board of Directors need be specified in the notice or waiver of notice of such meeting. A director who is present at a meeting of the Board at which action on any corporate matter is taken shall be presumed to have assented to the action taken unless a dissent is entered into the minutes of the meeting or unless such director files a written dissent to such action with the Secretary of the meeting before adjournment thereof or unless such director forwards a dissent by registered mail to the Secretary of the Corporation within twenty-four hours after adjournment of the meeting. The right to dissent shall not apply to a director who voted in favor of the action.

Section 2.13. Quorum, Adjournment, and Manner of Acting. A majority of the directors shall constitute a quorum of the Board at any annual, regular, or special meeting, but in the absence of a quorum of the Board, a minority shall have the power of adjournment. The action of a majority of the directors present at a meeting at which a quorum is present shall be the act of the Board of Directors. The leaving of a director or directors after the start of any annual, regular, or special meeting of the Board, such that less than a quorum remains, shall not negate the existence of a quorum, and any action taken by a majority of the directors counted in determining the existence of a quorum shall constitute the act of the Board of Directors.

Section 2.14. Conduct of Meetings. The Chairman of the Board of Directors or, in if absent, the President or, if absent, any Vice President shall preside at each meeting of the Board of Directors. If the Chairman of the Board, the President, and the Vice Presidents are all absent, a Chairman of the meeting shall be chosen by majority vote of the directors present. The Secretary or, if absent, any person chosen by the Chairman of the meeting shall act as Secretary of the meeting.

Section 2.15. Action Without a Meeting. Action which may be taken at a meeting of the directors may be taken without a meeting pursuant to applicable Colorado law, if a consent in writing setting forth the action so taken is signed by all of the directors entitled to vote with respect to the subject matter thereof. In case any such officer who has signed or whose facsimile signature has been placed upon any such certificate shall have ceased to be such officer before such certificate is issued, such certificate may nevertheless be issued by the Corporation with the same effect as if such officer were an officer at the date of its issue. The stock certificates shall state upon their face that the Corporation is organized under the laws of Colorado, the name of the person to whom issued, the number and class of shares represented thereby, the par value of each share represented by the certificate or a statement that the shares are without par value, and the date of issue of the shares. If the Corporation is authorized to issue shares of more than one class, every certificate representing shares issued shall set forth upon the face or back of the certificate that the Corporation will furnish to any shareholder upon request and without charge a full statement of the designations, preferences, limitations, and relative rights of the shares of each class authorized to be issued. The Board of Directors may direct that a new certificate or certificates be issued in place of any theretofore issued by the Corporation which are alleged to have been lost or destroyed, upon receipt by the Board of an affidavit of that fact by the person claiming an interest in the stock represented thereby. When authorizing such issue of a new certificate or certificates, the Board of Directors may, in its discretion and as a condition precedent to the issuance thereof, require the person claiming an interest in the stock represented by the certificate or certificates, or his legal representative, to give the Corporation a bond in such sum as it may direct as indemnity against any claim that may be made against the Corporation with respect to the certificates alleged to have been lost or destroyed.

Section 5.3. Transfer of Shares, Transfer Agent, Registrar. Transfers of shares of stock shall be made on the stock record or transfer books of the Corporation only by the person named in the stock certificate, or by his attorney lawfully constituted in writing, and upon surrender of the certificate therefore. The Corporation, by resolution of the Board, may from time to time appoint a transfer agent and, if desired, a registrar under such arrangements and upon such terms and conditions as the Board deems advisable. Until and unless the Board appoints some other person, firm, or corporation as its transfer agent, and upon the revocation of any such appointment, the Secretary of the Corporation shall be the transfer agent of the Corporation without the necessity of any formal action of the Board, and the Secretary shall perform all of the duties thereof.

Section 5.4. Recognition of Shareholder. The Corporation shall keep at its registered office a record of the names and addresses of all shareholders and the number and the class of shares held by each. The Corporation shall be entitled to recognize the exclusive right of a person registered on its books as the owner of shares to receive dividends and to vote as such owner. The Corporation shall be entitled to hold liable for calls and assessments a person registered on its books as the owner of shares and shall not be bound to recognize any equitable or other claims to or interest in such share or shares on the part of any other person, whether or not it shall have express or other notice thereof, except as otherwise provided by Colorado law.

INDEPENDENT ACCOUNTANT'S REVIEW REPORT

We have reviewed the accompanying financial statements of Locking Line Barriers Corporation (the "Company"), which comprise the balance sheets as of December 31, 2019 and 2018, and the related statements of operations, changes in stockholders' equity, and cash flows for the years then ended and the related notes to the financial statements. A review includes primarily applying analytical procedures to management's financial data and making inquiries of company management. A review is substantially less in scope than an audit, the objective of which is the expression of an opinion regarding the financial statements as a whole. Accordingly, we do not express such an opinion.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; this includes design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement whether due to fraud or error.

Accountant's Responsibility

Our responsibility is to conduct the review in accordance with Statements on Standards for Accounting and Review Services promulgated by the Accounting and Review Services Committee of the AICPA. Those standards require us to perform procedures to obtain limited assurance as a basis for reporting whether we are aware of any material modifications that should be made to the financial statements for them to be in accordance with accounting principles generally accepted in the United States of America. We believe that the results of our procedures provide a reasonable basis for our conclusion.

Accountant's Conclusion

LOCKING LINE BARRIERS CORPORATION
NOTES TO FINANCIAL STATEMENTS (UNAUDITED)
As of December 31, 2019 and 2018 and for the years then ended

NOTE 1: NATURE OF OPERATIONS

Locking Line Barriers Corporation (the "Company") is a corporation organized on October 10, 2015 under the laws of Colorado under the name of Locking Line Barriers and does business under the trade name WaterBlocks. The Company changed its name from Locking Line Barriers to Locking Line Barriers Corporation on February 12, 2018. The Company was formed to market and distribute the WaterBlocks product line.

As of December 31, 2019, the Company has not commenced planned principal operations nor generated revenue. The Company's activities since inception have consisted of formation activities and preparations to raise capital. Once the Company commences its planned principal operations, it will incur significant additional expenses. The Company is dependent upon additional capital resources for the commencement of its planned principal operations and is subject to significant risks and uncertainties; including failing to secure funding to operationalize the Company's planned operations or failing to profitably operate the business.

NOTE 2: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accounting and reporting policies of the Company conform to accounting principles generally accepted in the United States of America (GAAP).

The Company adopted the calendar year as its basis of reporting.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash Equivalents

For the purpose of the statement of cash flows, cash equivalents include time deposits, certificate of deposits, and all highly liquid debt instruments with original maturities of three months or less.

Stock Subscription Receivable

The Company records stock issuances at the effective date. If the subscription is not funded upon issuance, the Company records a stock subscription receivable as an asset on the balance sheet. When stock subscription receivables are not received prior to the issuance of financial statements at a reporting date in satisfaction of the requirements under FASB ASC 505-10-45-2, the stock subscription receivable is reclassified as a contra account to stockholders' equity on the balance sheet.

See accompanying Independent Accountant's Review Report

LOCKING LINE BARRIERS CORPORATION
NOTES TO FINANCIAL STATEMENTS (UNAUDITED)
As of December 31, 2019 and 2018 and for the years then ended

Intangible Assets

The Company capitalizes costs related to maintaining and filing patents, copyrights, and trademark applications and commences amortization over a patent's estimated useful life, typically 17 years, when a patent is successfully filed. During 2019 and 2018, the Company capitalized \$5,000 in each year in patent, copyright, and trademark related costs, resulting in intangible assets of \$10,000 and \$5,000 as of December 31, 2019 and 2018, respectively. Amortization expense for the year was not recorded as the patent is pending as of the date the financial statements were available to be issued.

Fair Value of Financial Instruments

Financial Accounting Standards Board ("FASB") guidance specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect market assumptions. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority to unobservable inputs (Level 3 measurement). The three levels of the fair value hierarchy are as follows:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. Level 1 primarily consists of financial instruments whose value is based on quoted market prices such as exchange-traded instruments and listed equities.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly (e.g., quoted prices of similar assets or liabilities in active markets, or quoted prices for identical or similar assets or liabilities in markets that are not active).

Level 3 - Unobservable inputs for the asset or liability. Financial instruments are considered Level 3 when their fair values are determined using pricing models, discounted cash flows or similar techniques and at least one significant model assumption or input is unobservable.

The carrying amounts reported in the balance sheets approximate their fair value.

Deferred Offering Costs

The Company complies with the requirement of FASB ASC 340-10-S99-1. Prior to the completion of the offering these costs are capitalized as deferred offering costs on the balance sheet. The deferred offering costs are charged to stockholders' equity upon the completion of the offering.

Income Taxes

The Company uses the liability method of accounting for income taxes as set forth in ASC 740, *Income Taxes*. Under the liability method, deferred taxes are determined based on the temporary differences between the financial statement and tax basis of assets and liabilities using tax rates expected to be in effect during the years in which the basis differences reverse. A valuation allowance is recorded when it is unlikely that the deferred tax assets will be realized.

See accompanying Independent Accountant's Review Report

-7-

LOCKING LINE BARRIERS CORPORATION
NOTES TO FINANCIAL STATEMENTS (UNAUDITED)
As of December 31, 2019 and 2018 and for the years then ended

The Company assesses its income tax positions and records tax benefits for all years subject to examination based upon its evaluation of the facts, circumstances and information available at the reporting date. In accordance with ASC 740-10, for those tax positions where there is a greater than 50% likelihood that a tax benefit will be sustained, our policy is to record the largest amount of tax benefit that is more likely than not to be realized upon ultimate settlement with a taxing authority that has full knowledge of all relevant information. For those income tax positions where there is less than 50% likelihood that a tax benefit will be sustained, no tax benefit will be recognized in the financial statements. The Company has determined that there are no material uncertain tax positions.

The Company accounts for income taxes with the recognition of estimated income taxes payable or refundable on income tax returns for the current period and for the estimated future tax effect attributable to temporary differences and carryforwards. Measurement of deferred income items is based on enacted tax laws including tax rates, with the measurement of deferred income tax assets being reduced by available tax benefits not expected to be realized in the immediate future. The Company estimates it will have net operating loss carryforwards of \$194,950 and \$58,767 as of December 31, 2019 and 2018, respectively. The Company pays federal and Colorado income taxes at a combined effective rate of approximately 25% and has used this effective rate to derive net deferred tax assets of \$48,070 and \$14,491 as of December 31, 2019 and 2018, respectively, resulting from its net operating loss carryforward. Due to uncertainty as to the Company's ability to generate sufficient taxable income in the future to utilize the net operating loss carryforwards before they begin to expire in 2038, the Company has recorded a full valuation allowance to reduce the net deferred tax asset to zero.

Since inception, no tax returns have been filed until they are legally required. All tax periods since inception remain open to examination by the taxing jurisdictions to which the Company is subject.

NOTE 3: GOING CONCERN

The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The Company is a business that has not yet generated revenue or profits, has sustained net losses of \$136,183 and \$58,767 during the years ended December 31, 2019 and 2018, respectively, has negative cash flows from operations, has an accumulated deficit of \$194,950 as of December 31, 2019.

The Company's ability to continue as a going concern in the next twelve months is dependent upon its ability to obtain capital financing from investors sufficient to meet current and future obligations and deploy such capital to produce profitable operating results. No assurance can be given that the Company will be successful in these efforts. These factors, among others, raise substantial doubt about the ability of the Company to continue as a going concern for a reasonable period of time. The balance sheet does not include any adjustments relating to the recoverability and classification of recorded asset amounts or the amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

NOTE 6: RECENT ACCOUNTING PRONOUNCEMENTS

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers* (Topic 606). This ASU supersedes the previous revenue recognition requirements in ASC Topic 605—Revenue Recognition and most industry-specific guidance throughout the ASC. The core principle within this ASU is to recognize revenues when promised goods or services are transferred to customers in an amount that reflects the consideration expected to be received for those goods or services. In August 2015, the FASB issued ASU 2015-14, *Revenue from Contracts with Customers*, which deferred the effective date for ASU 2014-09 by one year to fiscal years beginning after December 15, 2017, while providing the option to early adopt for fiscal years beginning after December 15, 2016. Transition methods under ASU 2014-09 must be through either (i) retrospective application to each prior reporting period presented, or (ii) retrospective application with a cumulative effect adjustment at the date of initial application. We are continuing to evaluate the impact of this new standard on our financial reporting and disclosures, including but not limited to a review of accounting policies, internal controls and processes. The Company adopted this new standard effective January 1, 2018.

In February 2016, the FASB issued ASU 2016-02, *Leases* (Topic 842). This ASU requires a lessee to recognize a right-of-use asset and a lease liability under most operating leases in its balance sheet. The ASU is effective for annual and interim periods beginning after December 15, 2019, including interim periods within those fiscal years. Early adoption is permitted. We are continuing to evaluate the impact of this new standard on our financial reporting and disclosures.

Management does not believe that any recently issued, but not yet effective, accounting standards could have a material effect on the accompanying consolidated balance sheet. As new accounting pronouncements are issued, the Company will adopt those that are applicable under the circumstances.

NOTE 7: CONTINGENCIES

The Company may be subject to pending legal proceedings and regulatory actions in the ordinary course of business. The results of such proceedings cannot be predicted with certainty, but the Company does not anticipate that the final outcome, if any, arising out of any such matter will have a material adverse effect on its business, financial condition or results of operations.
